

SISUS 'MOSH SPLIT'

GENERAL

- o Duration: 45 minutes
- o Number of people on tour: 5 artists and occasionally a producer
- o Location: outdoors, indoors or in a circus tent
- o Conditions: not possible outdoors when raining
- o Transportation: one van
- o Circus disciplines: swinging trapeze, foot juggling, skipping rope, washington trapeze, pair-and floor acrobatics

STAGE

- o Minimum 8m x 6m. Hard, stable, flat, dry and clean surface. The organizer provides a wooden stage floor (cassette floor or stage elements that can be levelled)
- o The surface for the truss structure needs to be hard, stable, flat and dry
- o Outdoor conditions: the aerial structure requires 4 anchor points of minimum 1000kg each (concrete blocks, water tanks or weight blocks). Preferable on a wooden pallet to prevent sliding.
- o The organizer provides the weights build up.
- o Anchor points placed and show area reserved for buildup the day before, or minimum 4 hours before show time.
- o 4 volunteers needed for buildup and build down for 45 minutes.
- o Tear down: 4 hours possibility of loading and unloading nearby the pitch.
- o If performed indoors without the truss structure, we will provide detailed technical rider for the specific needs to rig the swinging trapeze and washington trapeze.

ELECTRICAL EQUIPMENT

- o The organizer provides the necessary PA equipment and two microphones
- o Speak (microphone) and music played simultaneously
- o Music copyrights to be provided by organizer, playlist on request
- o If the show has to be performed in the dark or by twilight the organizer has to provide lighting and a technician
- o The organizer provides sufficient electricity for PA equipment, lights and three vacuum cleaners(2500V)

OTHER

- o Space for warming up near the stage and safe storage for the artists personal belongings
- o The organizer provides a parking space for the van
